

NATURAL RESOURCES CANADA - INVENTIVE BY NATURE

Job Opportunities for Northerners

Call for interest

Geological Survey of Canada (GSC), Geo-mapping for Energy and Minerals (GEM)

The GEM program conducts field studies and office based analysis in order to update public geological maps and knowledge of Canada's north. GEM is looking for students from all levels (post-secondary to university) from the north with knowledge in geoscience, communications, social sciences or related subjects, interested in how the GSC does its work.

A job with GEM is an excellent opportunity for you to share your knowledge, and to help northern communities develop familiarity with the geoscience studies taking place. This experience is aimed to help you be engaged and active in future decisions affecting land-use and resource development.

As we begin to prepare for the 2017 summer season (May to August) a variety of job opportunities could become available:

- Field related work
- Science communications
- Data entry
- Laboratory analysis
- GIS work

With the exception of field work, all jobs will be in GSC facilities, with the possibility of an extension to work part-time during the fall and winter.

If you are currently exploring summer job options and from a northern community - this may be the opportunity for you!

If interested, contact NRCan.GEM-GEM.RNCan@canada.ca for consideration. Please include your CV, the name of the northern community in which you reside, and the type of job you are interested in. We look forward to hearing from you!

For more information about GEM checkout our videos by visiting our website at: www.nrcan.gc.ca/GEM
