

32. area above false ceiling: regularly spaced notches show on the walls, suggesting upper floor framing consistent with the 1 1/2 storey wall heights. The existing construction consists of full dimension 2x6 framing @ 16 o.c., supported at mid span by the "truss"

33. area above false ceiling, the truss: the lower ceiling joists are notched out at the truss for a 1x2 ledger. The steel tension rod holding the central posts shows in the middle of the photograph
