

CAREER OPPORTUNITY

Goldcorp is one of the world's fastest growing senior gold producers with operations and development projects located in safe jurisdictions throughout the Americas. A Canadian company headquartered in Vancouver, British Columbia, Goldcorp employs more than 15,000 people worldwide. The company is well-positioned to deliver sustained, industry leading growth and performance. We are able to do this because as a company we believe in safe production, acting ethically, respecting all our stakeholders, open communication, empowering others and innovation.

A Goldcorp career can take you from the far north of Canada to the plains of Argentina—and wherever you go, you'll find a vibrant, supportive, performance-driven culture, and consistent Goldcorp principles of sustainable prosperity, teamwork, workplace safety, environmental stewardship and respect for local cultures.

Exploration Data Specialist

Coffee Project

The Coffee Gold Project in Yukon is currently seeking a Database Geologist/Technologist to join our Exploration department. The successful candidate will be responsible for updating and maintaining quality control for the drill exploration database and other surficial exploration GIS data. While primarily reporting to the Project Geologist and GIS Specialist, the successful candidate will broadly provide service to all geological staff by ensuring exploration data is current, quality controlled and in a state ready for interpretation. Tasks may not be limited to the field office environment and may require the successful candidate to carry out various field or camp related tasks in a physically challenging work environment. Maintaining focus on safety and environmental protection in all aspects of the job is a requirement for all staff. This position is based out of the Coffee Project field exploration camp during the drill season and potentially out Whitehorse office during the winter season.

Responsibilities

- Geological database management including drill hole, geochemical, geotechnical and assay data
- GIS work including data collection, map generation, presentation graphics, file organization
- Quality control reporting for all data
- Varied camp duties and miscellaneous field work
- IT desktop support

Requirements

- The preferred candidate will hold a BSc in Geology or diploma in Mining or Geology
- Experience working and getting along well with others in a field environment
- Knowledgeable in ArcGIS, Microsoft Access and Leapfrog
- Strong IT skills
- Exceptional organizational and computer skills
- Strong geological background
- Willingness to take direction and work independently
- Strong commitment to working in a safe, socially responsible manner
- Experience working in a culturally diverse environment an asset

This will be a fly-in/fly-out position based at the Coffee Project site, rotational schedule to be determined.

Goldcorp. Inc. welcomes and encourages applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.

How to Apply

Applications close on January 26, 2018 Please apply with your resume to reesa.meltzer@goldcorp.com At this time, we are not accepting candidates referred by recruitment agencies.
