

## CAREER OPPORTUNITY

Goldcorp is one of the world's fastest growing senior gold producers with operations and development projects located in safe jurisdictions throughout the Americas. A Canadian company headquartered in Vancouver, British Columbia, Goldcorp employs more than 15,000 people worldwide. The company is well-positioned to deliver sustained, industry leading growth and performance. We are able to do this because as a company we believe in safe production, acting ethically, respecting all our stakeholders, open communication, empowering others and innovation.

A Goldcorp career can take you from the far north of Canada to the plains of Argentina—and wherever you go, you'll find a vibrant, supportive, performance-driven culture, and consistent Goldcorp principles of sustainable prosperity, teamwork, workplace safety, environmental stewardship and respect for local cultures.

### Junior Geologist

#### Coffee Gold Project, Yukon

Reporting to the Exploration Manager, the Junior Geologist will contribute to the ongoing development of the Coffee 'geological and mineral system model', with the aim to improve upon exploration targeting and resource development at Coffee. This role requires the candidate to maintain high levels of safety and demonstrate environmental awareness by following all government and corporate regulations and policies. This position is seasonal and is expected to run from March through to November, but could be shorter or longer dependent on drill results. This role has the potential for growth and career advancement at the proposed Coffee Gold Mine in production or exploration geology.

#### Responsibilities

- Logging of geological and spatial drilling data
- Supervision of drilling & other contractors to ensure a safe production work place
- Conduct mapping and surface geochemical sampling programs, including regolith and outcrop mapping, and rock chip, soil and stream sediment sampling
- Assist contractors during geophysical field survey programs
- Prepare sample submission to assay laboratories; track and receive assay results
- Data entry of geological logs and spatial data with regard to quality control; and validation and quality control of all exploration data to ensure a robust exploration database
- Extraction, manipulation and plotting of data on plans and sections using exploration and mining software to visualize and present exploration results
- Contribute to weekly deliverables and interpretation of geological, assay and geophysical data

#### Requirements

- Bachelor of Science Degree in Geology or equivalent (In progress or completed)
- Prior work experience at a mining/exploration operation highly regarded
- Demonstrated excellent work ethic, communication & organizational skills
- Ability to work outdoors in all conditions
- Able to work in camp setting on a rotational basis
- Able to work day shift or night shifts

This will be a fly-in/fly-out position based at the Coffee Project site, rotational schedule will be two weeks in/two weeks out.

Goldcorp. Inc. welcomes and encourages applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.

#### How to Apply

Applications close on January 26, 2018. Please email resumes to [reesa.meltzer@goldcorp.com](mailto:reesa.meltzer@goldcorp.com). At this time, we are not accepting candidates referred by recruitment agencies.
