

Alexco Resource Corp. owns the historic Keno Hill Silver District located in Canada's Yukon Territory. Alexco is advancing the district towards a production decision by the second half of 2018 with the development of two new underground deposits. This is a great opportunity to be part of the team that is building one of the highest-grade silver operations in the world. As part of the district development team, Alexco has an immediate opening for a:

## **Mill Maintenance Superintendent**

### **Position Overview:**

The Mill Maintenance Superintendent will provide support and leadership to the Keno Hill District development team by playing a key role in the rehab and commissioning of the Keno Hill District Mill. Reporting initially to the Site Services Manager, the Mill Maintenance Superintendent will work with all levels of the organization, employees and contractors to contribute to the successful execution of the development project. The 14/14/12 position is based at the Keno Hill District site. The point of hire for this position is Whitehorse, Yukon with the company providing travel from Whitehorse to Mayo on a weekly rotation basis.

### **Major Responsibilities:**

- Develop, coach and lead the Mill Maintenance team including millwrights, welders, and electricians;
- Prepare plans, schedules, and work orders for implementation of the mill maintenance program;
- Develop and maintain mill maintenance capital and operating budgets, forecasts, monthly reporting and analysis;
- Develop and implement capital projects for mill improvement and operating efficiency;
- Develop and implement preventative maintenance programs to ensure mill availability and reliability;
- Analyze and interpret equipment operating and maintenance trends and prepare maintenance plans to maintain acceptable maintenance costs and availability;
- Support and maintain value-based Safety Management System that enables a continuous process of identifying and managing hazards/risks, monitoring compliance, and following up with employees;
- Promote environmental stewardship of Alexco's properties and compliance to standards and regulations;
- Ensure employees' skills are developed to reach their full potential and meet organizational goals;
- Work closely with the senior management team to collaboratively identify and implement site-wide improvements and initiatives.

### **Education and Experience:**

- Minimum Red Seal Millwright certification;
- 10 years' experience in a mill process environment with a minimum of 5 years at a supervisory level;
- Self-starter and forward thinker – ability to take charge in the role;
- Able to read engineering plans with a good understanding of mill process units;
- Strong oral and written communication skills and excellent computer skills.

Only those applicants who possess the skills and education requirements noted above need apply. Applicants must be legally entitled to work in Canada. Occupational drug and alcohol and other testing will be a condition of employment. Alexco provides camp room and board for employees residing outside of the immediate area. Start date: as soon as possible. Please send your resume with cover letter outlining your relevant experience to the attention of HR Manager, Alexco Resource Corp., [hr@alexcoresource.com](mailto:hr@alexcoresource.com) or fax to 604-633-4887. Closing Date: until filled
