

# RECLAMATION ENGAGEMENT EVENT

*How can we tell when riverbank habitats have recovered from changes made by mining?*

Yukon Seed & Restoration, FloraTek Consulting, and the FNNND Lands Department are working together to identify indicators that reflect FNNND's understanding of successful mine reclamation in riverbank habitats. This work is part of the development of a cumulative effects framework for land use planning in FNNND's Traditional Territory.

**We want YOU to be involved!**

Participants will receive **honorariums** for their time. Lunch, snacks, and transportation provided.

**JULY 6-8**  **Mayo, YT**

More details to come!
